

Exam : Cisco 642-515

**Title : Securing Networks with
ASA Advanced**

Version : Demo

Cheat-Test, [help you pass any IT exam!](#)

1. The following exhibit shows a Cisco ASA security appliance configured to participate in a VPN cluster. According to the exhibit, to which value will you set the priority to increase the chances of this Cisco ASA security appliance becoming the cluster master?

Configuration>Remote Access VPN>Load Balancing

Participate in Load Balancing Cluster

VPN Cluster Configuration

All servers in the cluster must get an identical cluster configuration.

Cluster IP address: UDP port:

Enable IPsec encryption

IPsec shared secret: Verify secret:

VPN Server Configuration

Public interface: Priority:

Private interface: NAT assigned IP address:

As a VPN cluster master, this device can send a fully qualified domain name (FQDN) using reverse DNS lookup of a cluster device, instead of its outside IP address, when redirecting VPN client connections to that cluster device.

Send FQDN to client instead of an IP address when redirecting

Note

All of the outside and inside network interfaces on the load-balancing devices in a cluster must be on the same IP

- A. 100
- B. 0
- C. 10
- D. 1

Cheat-Test.com Answer: C

2. Tom works as a network administrator for the CISCO company. The primary adaptive security appliance in an active/standby failover configuration failed, so the secondary adaptive security appliance was automatically activated. Tom then fixed the problem. Now he would like to restore the primary to active status. Which one of the following commands can reactivate the primary adaptive security appliance and restore it to active status while issued on the primary adaptive security appliance?

- A. failover reset
- B. failover primary active
- C. failover active
- D. failover exec standby

Cheat-Test.com Answer: C

3. You work as a network administrator for your company. Study the exhibit carefully. ASDM is short for Adaptive Security Device Manager. You are responsible for multiple remote Cisco ASA security appliances administered through Cisco ASDM. Recently, you have been tasked to configure one of these Cisco ASA security appliances for SSL VPNs and are requiring a client certificate, as shown.

How will this configuration affect your next ASDM connection to this Cisco ASA security appliance?

- A. You would be required to download the identity certificate of the remote Cisco ASA security appliance.
- B. You would be asked to present an identity certificate. If you did not have one, the Cisco ASA security appliance would prompt you for authentication credentials, consisting of a username and password.
- C. Your connection would be handled the way it is always handled by this Cisco ASA security appliance.
- D. You would be required to have an identity certificate that the Cisco ASA security appliance can use for authentication.

Cheat-Test.com Answer: D

4. Which three statements correctly describe protocol inspection on the Cisco ASA adaptive security appliance? (Choose three.)
- A. For the security appliance to inspect packets for signs of malicious application misuse, you must enable advanced (application layer) protocol inspection.
 - B. If you want to enable inspection globally for a protocol that is not inspected by default or if you want to globally disable inspection for a protocol, you can edit the default global policy.
 - C. The protocol inspection feature of the security appliance securely opens and closes negotiated ports and IP addresses for legitimate clientserver connections through the security appliance.
 - D. If inspection for a protocol is not enabled, traffic for that protocol may be blocked.

Cheat-Test.com Answer: B, C, D

5. Study the following exhibit carefully. You work as the network administrator of a corporate Cisco ASA security appliance with a Cisco ASA AIPSSM. You are asked to use the AIPSSM to protect corporate DMZ web servers. The AIPSSM has been configured, and a service policy has been configured to identify the traffic to be passed to the AIPSSM. On which two interfaces would application of the service policy for the AIPSSM be most effective while causing the least amount of impact to Cisco ASA security appliance performance? (Choose two.)

- A. Internet interface
- B. dmz interface
- C. globally on all interfaces
- D. outside interface

Cheat-Test.com Answer: B, D

6. Multimedia applications transmit requests on TCP, get responses on UDP or TCP, use dynamic ports, and use the same port for source and destination, so they can pose challenges to a firewall. Which three items are true about how the Cisco ASA adaptive security appliance handles multimedia applications? (Choose three.)

- A. It dynamically opens and closes UDP ports for secure multimedia connections, so you do not need to open a large range of ports.
- B. It supports SIP with NAT but not with PAT.
- C. It supports multimedia with or without NAT.
- D. It supports RTSP, H.323, Skinny, and CTIQBE.

Cheat-Test.com Answer: A, C, D

7. Which two options are correct about the impacts of this configuration? (Choose two.)

```
classmap
INBOUND_HTTP_TRAFFIC
match accesslist
TOINSIDEHOST
classmap
OUTBOUND_HTTP_TRAFFIC
match accesslist
TOOUTSIDEHOST
policymap
MYPOLICY
class INBOUND_HTTP_TRAFFIC
inspect http
set connection connmax
100
policymap
MYOTHERPOLICY
class OUTBOUND_HTTP_TRAFFIC
inspect http
servicepolicy
```

MYOTHERPOLICY interface inside
servicepolicy

MYPOLICY interface outside

- A. Traffic that matches access control list TOINSIDEHOST is subject to HTTP inspection and maximum connection limits.
- B. Traffic that enters the security appliance through the inside interface is subject to HTTP inspection.
- C. Traffic that enters the security appliance through the outside interface and matches access control list TOINSIDEHOST is subject to HTTP inspection and maximum connection limits.
- D. Traffic that enters the security appliance through the inside interface and matches access control list TOOUTSIDEHOST is subject to HTTP inspection.

Cheat-Test.com Answer: C, D

8. Refer to the exhibit. You have configured a Layer 7 policy map to match the size of HTTP header fields that are traversing the network. Based on this configuration, will HTTP headers that are greater than 200 bytes be logged?

```
policy-map type inspect http TEST
  parameters
    match request header length gt 100
    reset www.Cheat-Test.com Demo
    match request header length gt 200
  log
```

- A. No, because the reset action for headers greater than 100 bytes would be the first match.
- B. Yes, because the log action for headers greater than 200 bytes would be the last match.
- C. Yes, because the reset action for headers greater than 100 bytes and the log action for headers greater than 200 bytes would both be applied.
- D. No, because reset or log actions are a part of the service policy and the Layer 7 policy map.

Cheat-Test.com Answer: A

9. What is the reason that you want to configure VLANs on a security appliance interface?

- A. for use in conjunction with devicelevel failover to increase the reliability of your security appliance
- B. for use in transparent firewall mode, where only VLAN interfaces are used
- C. to increase the number of interfaces available to the network without adding additional physical interfaces or security appliances
- D. for use in multiple context mode, where you can map only VLAN interfaces to contexts

Cheat-Test.com Answer: C

10. You work as a network security administrator for your company. Now, you are asked to configure the corporate Cisco ASA security appliance to take the following steps on its outside interface:

- rate limit all IP traffic from telecommuting system engineers to the insidehost
 - drop all HTTP requests from the Internet to the web server that have a body length greater than 1000 bytes
 - prevent users on network 192.168.6.0/24 from using the FTP PUT command to store .exe files on the FTP server
- In order to achieve this objective, which set of Modular Policy Framework components will be included?

- A. one Layer 7 class map, two Layer 7 policy maps, three Layer 3/4 class maps, one Layer 3/4 policy map
- B. three Layer 7 policy maps, one Layer 3/4 class map, one Layer 3/4 policy map
- C. one Layer 7 class map, one Layer 7 policy map, three Layer 3/4 class maps, one Layer 3/4 policy map
- D. two Layer 7 class maps, one Layer 7 policy map, three Layer 3/4 class maps, one Layer 3/4 policy map

Cheat-Test.com Answer: A

11. Which one of the following commands can provide detailed information about the crypto map configurations of a Cisco ASA adaptive security appliance?

- A. show ipsec sa
- B. show crypto map
- C. show run ipsec sa
- D. show run crypto map

Cheat-Test.com Answer: D

12. Cisco ASA 5500 Series Adaptive Security Appliances are easy to deploy solutions that integrate worldclass firewall, Unified Communications (voice/video) security, SSL and IPsec VPN, intrusion prevention (IPS), and content security services in a flexible, modular product family. You are asked to configure a Cisco ASA 5505 Adaptive Security Appliance as an Easy VPN hardware client. In the process of configuration, you defined a list of backup servers for the security appliance to use. After several hours of being connected to the primary VPN server, the security appliance fails. You notice that your Easy VPN hardware client has now connected to a backup server that is not defined within the configuration of the client. Where did your Easy VPN hardware client get this backup server?

- A. The connection profile that was configured on the primary VPN server was pushed to your Easy VPN hardware client and overwrote the list of backup servers that you had configured.
- B. The group policy that was configured on the primary VPN server was pushed to your Easy VPN client and overwrote the list of backup servers that you had configured.
- C. The backup servers that you listed were not configured as VPN servers, so the Easy VPN hardware client used the list of backup servers retrieved from the primary server.
- D. The backup servers that you listed were no longer available, so the Easy VPN hardware client used the list of backup servers that it retrieved from the primary server.

Cheat-Test.com Answer: B

13. Which three features can the Cisco ASA adaptive security appliance support? (Choose three.)

- A. BGP dynamic routing
- B. 802.1Q VLANs
- C. OSPF dynamic routing
- D. static routes

Cheat-Test.com Answer: B, C, D

14. You are the network administrator for your company. Study the exhibit carefully. You are responsible for a Cisco ASA security appliance configured with a local CA. According to the exhibit below, what is the reason that the user student1 will use this password?

- A. retrieval of the Cisco ASA security appliance identity certificate
- B. retrieval of the digital certificate from the local CA on the Cisco ASA security appliance
- C. the initial authentication to the SSL VPN server
- D. authentication to the SSL VPN server

Cheat-Test.com Answer: B

15. Which two statements are true about multiple context mode? (Choose two.)

- A. Multiple context mode does not support IPS, IPsec, and SSL VPNs, or dynamic routing protocols.
- B. Multiple context mode enables you to create multiple independent virtual firewalls with their own security policies and interfaces.
- C. Multiple context mode enables you to add to the security appliance a hardware module that supports up to four independent virtual firewalls.
- D. When you convert from single mode to multiple mode, the security appliance automatically adds an entry for the admin context to the system configuration with the name "admin."

Cheat-Test.com Answer: B, D

Cheat-Test.com - The Worldwide Renowned IT Certification Material Provider!
The safer, easier way to help you pass any IT Certification exams.

We provide high quality IT Certification exams practice questions and answers (Q&A). Especially [Cisco](#), [Microsoft](#), [HP](#), [IBM](#), [Oracle](#), [CompTIA](#), [Adobe](#), [Apple](#), [Citrix](#), [EMC](#), [Lotus](#), [Nortel](#), [SUN](#) and so on.

And help you pass any IT Certification exams at the first try.

Cheat-Test product Features:

- Verified Answers Researched by Industry Experts
- Questions updated on regular basis
- Like actual certification exams our product is in multiple-choice questions (MCQs).
- Our questions and answers are backed by our GUARANTEE.

7x24 online customer service: contact@cheat-test.com
